

## How to Complete a Stock Order for Your Depot:

Using the Deck Stock Form, fill out both the full and empty columns. If the amount in the deck stock column does not match the full amount, you will need to order 'x' amount of cylinders to make it the same as the deck stock.

## Example:

This is the size of the cylinders, measured in M3 or KG. This will match the diamond sticker on the cylinder.

This is your deck stock, which is how many of this cylinder type you should have onsite
